

## Owner's Representative

For added protection and peace of mind, Capillary Concrete offers a 10-year guarantee and in order to take part, **the following conditions must be followed. Furthermore, this document must be read carefully and the fields for signatures below must be signed and then sent back to Capillary Concrete BEFORE the start of the installation.**

1. In order to be eligible for the Financial Guarantee the following must be checked after the Capillary Concrete has been allowed to cure for at least 24 hours and absolutely before sand:
  - a. The surface should be smooth and there should be NO loose stones
  - b. During the water test-Make sure the entire surface drains perfectly and that there is no standing water anywhere in the bunker. Please watch this video: <http://www.capillaryconcrete.com/instalation/>
2. I, the Owner's Representative, will confirm the above-mentioned tests have been completed and successful for each bunker before allowing the contractor or installer to add sand to the bunkers.
